How smart are smartphones for teens?
The following information is based on research done by psychologists from San Diego State University and the University of Georgia and published in the journal Emotion. The study, Monitoring the Future, is based on 1.1 million adolescent’s responses between 1991 and 2016.

- 37 percent of American teenagers had smartphones in 2012
- 73 percent of American teenagers had smartphones in 2016
- Between 1991 and 2016, adolescents who spent more time on social media, texting, electronic games, the internet, etc. were less happy, less satisfied with their lives and had lower self-esteem.
- Teens that spent less time on screen activities had higher psychological well-being reports including greater happiness, higher self-esteem and more satisfaction with their lives.
Finding the Good. A good a way to start the day
People that record or share three good events each morning are happier. A 2005 study led by psychologist Martin Seligman in Pennsylvania found that listing three positive events was a technique that promoted happiness and decreased depressive symptoms. Last year a Duke University researcher along with colleagues in Switzerland reported that the technique improved well-being. — StarTribune, Science and Health, Brainerd project finds the Power in Three Good Things, Jeremy Olson, January 28, 2018 The information is based on Multiple studies cited in the article.

Quotes and Quotables

Kids and Character
• “Every non-screen activity was correlated with greater happiness, and every screen activity was correlated with less happiness.” – Monitoring the Future
• “The problem is that my generation was pacified into believing that racism existed only in our history books.” – Chance the Rapper
• “The time is always right to do what is right.” – Martin Luther King, Jr.
• “The right to do something does not mean that doing it is right.” – William Safire
• “Character is doing the right thing when nobody’s looking.” – J.C. Watts

Leadership
• “Leadership is not about the next election, it’s about the next generation.” – Simon Sinek, author, speaker and marketing consultant

The Future
• “Employers want workers with strong skills in written and oral communication, teamwork and ethical decision-making, as well as the ability to think critically.” – Nancy Crotti, Real-World Skills, Twin Cities Business, February 2018
• I grew up in a physical world, and I speak English. The next generation is growing up in a digital world, and they speak social. – Angela Ahrendts, Senior Vice President of Apple
