StormReady in a Box
Application Element 1-3 and 2-7: After Hours Preparedness

**Purpose:** The StormReady Supporter application requires that the facility be StormReady, even after hours when administrative staff may not be on site.

**Instructions for Teacher:** For elements 1-3 and 2-7, it will be necessary to clarify any (if at all) changes to your school’s procedures for warning reception and communication after school hours. If there are no changes, but the person monitoring the weather situation (e.g. instead of the Principal it is the head janitor), denote that on the form and that the procedures will largely remain the same. This information should be spelled out in your school’s Emergency Operations Plan (see Element 3-1) or discussed with your building administration. If your school does not host activities after hours, be sure to denote that on the StormReady Supporter application form.
