

Purpose: The StormReady Supporter application has space for the applicant to discuss anything special about the facility in terms of weather/emergency preparedness.

Instructions for Teacher: If you or the administration are aware of any pertinent information regarding the building and its preparedness not discussed in prior elements, feel free to denote that information under this element. Any additional preparedness in the building is a good thing. Be sure to write anything, even if you question its relevance to being a StormReady Supporter. Any and all procedures that relate to being weather and environment aware are all good and important to denote on this portion of the application. If there are not any special characteristics of the building, the word “none” should be written. It should not hinder your overall StormReady Supporter application.
