

COMPLEX PROJECTS SOLVED

K-12 EDUCATION

WHO WE ARE

Hoffmann + Uhlhorn Construction, Inc. //

H+U Construction // "H•and•U" has been helping clients navigate complex construction projects since 1983 - from concept through completion, and beyond.

Whether your district is building a new school, or you're looking to renovate and expand your existing facilities, H+U Construction can help chart a course to get from where you are to where you want to be. We offer a full suite of planning and construction services that are tailored to meet client's specific goals, provide a personalized experience, and ultimately deliver the outcome that you and your stakeholders deserve. With your satisfaction as our top priority, H+U never says goodbye - we remain committed to our clients and the quality of their facilities long after construction has ended.

H+U has built or improved more than 15,000,000 square-feet of space and completed more than 500 multi-million-dollar projects on-schedule and within budget. We have been ranked as one of the "Top-25" Twin Cities area General Contractors by the *Minneapolis/St. Paul Business Journal* each year for more than a decade, and take pride in being a great place to work for and with.

EXPERTISE

When embarking on a construction project, Owners must select how their project will be designed and constructed. The H+U Construction team provides project delivery using a variety of contracting methods tailored to best meet each Owner's specific construction needs. See which approach will work best for you:

CONSTRUCTION MANAGEMENT + GENERAL CONTRACTING
OWNER REPRESENTATION + CONSTRUCTION CONSULTING

OUR CORE VALUES

H+U's Core Values are the backbone of the company and actively embedded within our culture. H+U Construction is committed to the following core values:

- + H+U Delivers
- + H+U Innovates
- + H+U is Positive
- + H+U is Humble and Helping
- + H+U is Impactful

“ We believe construction projects are far greater than the sum of their parts. ”

EDUCATION

At H+U, education is extremely important to us, with roots that go back nearly 40 years working on school-related planning, referendum, and construction projects. We've completed school projects large and small, including some of the largest district-wide building programs in the Midwest, but our focus is always on the individual students and creating a safe environment that promotes their growth and development both during and after construction.

SAFETY + SUSTAINABILITY

SAFETY

At H+U Construction, our people are our most important resource. Health and safety are essential to our enduring principles and are ingrained into the work we do for clients every day. H+U is continually focused on building an internal culture that keeps safety at the forefront of everything we do, and the expectation that every worker goes home from our construction sites in the same condition they arrived in.

SUSTAINABILITY

H+U Construction has completed projects using a multitude of different green building certification systems which include Leadership in Energy and Environmental Design (LEED), the Green Globes rating system from the Green Building Initiative (GBI), the U.S. Green Building rating system from United States Green Building Council (USGBC), the ENERGY STAR rating system, and Buildings Benchmarks and Beyond (B3) from the State of Minnesota.

H+U's experience in green construction has included 2 of the first 10 LEED Certified buildings in the state of Minnesota, the first Green Globes Certified Fire Station in the nation, and the first project in Minnesota to receive 3 Green Globe awards for New Construction. In addition to green construction, H+U has led the construction industry in developing a green approach toward operations.

BUILDING FOR THE FUTURE

H+U Construction has been serving K-12 school districts in Minnesota for 37+ years. We have served as the Construction Manager for more than 400 on-schedule and on-budget school projects on behalf of more than 35 school districts in the state. However, our focus is not on how many schools we build, it is on how we build them and who we build them for.

We create environments that promote student growth and development. We take the time to understand not only your immediate need but your district's overall goals for how facilities can improve education.

In addition to keeping your scope, schedule, and budget in alignment, we also place great emphasis on another critical project component - safety. We know that people are a district's greatest asset and our team is mindful of students, teachers, administrators, subcontractors, and the general public on every project site.
