

Teletherapy Essentials

PresenceLearning Platform and Training
Now Available to School-Based Teams

About PresenceLearning

PresenceLearning's clinical team has years of experience delivering services in a teletherapy format. Our clinical experts have overseen millions of online therapy sessions, many conducted in-home with the support of a parent. They've developed practical, effective approaches for getting the most out of teletherapy and are now sharing that experience with school-based clinicians facing the responsibility of adapting to online services for the first time.

The PresenceLearning proprietary platform is now available to support the continuation of services to students as school reopens online and in hybrid approaches. We're offering three new teletherapy offerings and training products designed to meet your school districts' unique needs.

Teletherapy Essentials

Includes PresenceLearning platform access and training for clinicians as well as access for support personnel and other educators, to make the most out of remote learning. (Access for support personnel and other educators is included). This offer is designed for:

- Speech-Language therapists for therapy and assessments
- Occupational Therapists for therapy and assessments
- Behavioral & Mental Health professionals
- Physical Therapists
- Other School Educators
- Support Personnel
- Administrators
- Paraprofessionals

Teletherapy Essentials + Psychoeducational Assessments

Includes PresenceLearning platform access and training plus assessments for those eligible to conduct psychoeducational assessments. This offer is designed for:

- School Psychologists/LSSPs
- Diagnosticians
- Other mental health professionals who conduct Psychoeducational Assessments

Teletherapy Essentials + Academic Achievement

Includes PresenceLearning platform access and training plus select achievement tests. This offer is designed for teachers and other people who give the achievement portion of assessments, such as:

- SPED Teachers
- SAI Instructors
- Resource Teachers, etc.

PresenceLearning has given me so much more depth to my professional toolbox and knowledge. I've been doing this for 25 years and thought I'd really picked up most of what there is to know. And then I met people from all around the country and realized I still have a lot to learn.

—Angela Coyle, School Psychologist

All 3 Teletherapy Essentials offerings come with these 3 training components

Teletherapy Foundations

Online, self-guided modules to get you started and familiarize you with the PresenceLearning Platform. Includes comprehensive video tutorials using different activities from the Platform library followed by guided practice

Clinical Applications

Live training led by PresenceLearning Clinical Experts to apply what you learned in Foundations to real-world scenarios. Training is specific to each therapy type or role.

Clinical Workshops

Ongoing live workshops led by PresenceLearning Clinical Experts to support you as you go. Register for sessions focused on each discipline—Speech-Language Pathology, Occupational Therapy, Behavioral & Mental Health, as well as Educators and Support Personnel.

Training Topics

- Practical, effective approaches for getting the most out of teletherapy in home environments
- Teletherapy & Tele-assessment basics—how to get up and running quickly
- Strategies for managing student focus and engagement
- Communication and training templates for parents supporting sessions at home
- Managing and monitoring student environments remotely
- Developing trust and rapport through screens
- How to make the most of the content and tools in the PresenceLearning platform
- Support training for tele-assessment

“

The teletherapy trainings have been incredibly invaluable. I was not taught to do speech in this way and always thought therapy needed to be conducted in person. The team at PresenceLearning showed me this wasn't the case—they were so supportive and answered all my questions so that I could jump right in.

—Melissa Phillips, CCC-SLP at Lewis Cass ISD

Assessments

Each Teletherapy Essentials offering comes with a suite of the most commonly used assessments for related users including speech assessments covering articulation/phonology, full language battery, bilingual language battery, pragmatic language, fluency, and early childhood, plus psychoeducational assessments from top publishers including the Woodcock-Johnson® IV and the WISC®-V. This list is subject to change. For a full list of assessments visit presencelearning.com.
