Easy to use for all levels of users

Each student's information in one convenient place

A PreK-12 DATA WAREHOUSE SOLUTION

Data to Decisions *Quickly!*

A PreK-12 DATA  
WAREHOUSE SOLUTION

**Today's educators must respond to critical school improvement plans, staff development needs and student achievement goals.**

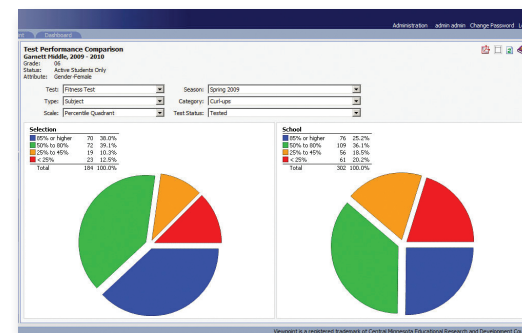

Managing and distributing a wide variety of student, staff, and national, state and local assessment data can be a daunting task. To meet this challenge, your district needs a complete, flexible, user-friendly data warehouse solution that lets you share data, identify trends, filter sort, aggregate and disaggregate data and transform this information into knowledge.

## Data to Decisions *Quickly...*with Viewpoint®!

### DASHBOARDS, REPORTS, CHARTS, AND GRAPHS

#### Visualize complex data!

- User dashboards for quick access to key reports
- Click to open grid reports, then easily select, sort and filter the data to meet your needs
- Standard graphical reports with 'drillable' charts to easily identify and target groups of students
- Reports link to instructional resources
- Point and click on standard graphical reports
- Create and publish custom reports

Click through charts to easily view and access student detail by proficiency levels on any assessment

### STUDENT ELECTRONIC CUMULATIVE FILES

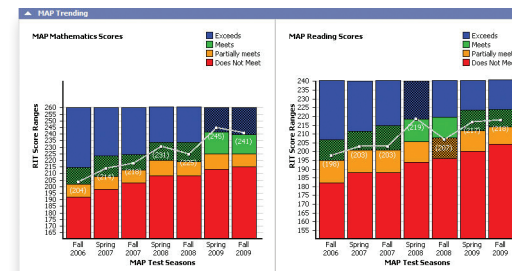

#### View all the student's information in one place!

- Complete access to all the student's assessment, enrollment, grades, attendance, discipline, intervention, achievement trend, contact, medical information and more
- See current and historical schedules and grades

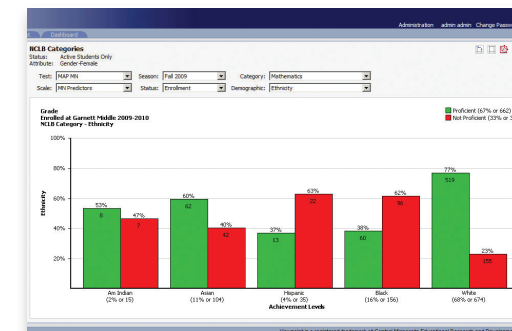

### DATA MODEL WITH TOOLS TO LOAD & CLEAN UP DATA

- Underlying data model designed specifically for K-12 school districts
- Web-based data loading tool to help you transform and load your data

Student achievement over time

ESSA reports

### OTHER FEATURES

- Ability to use dynamic grouping or create custom student groups and save them
- Integrates with LDAP or Active Directory for easy user management
- Integrates with Student Plans ILP—district-determined criteria in Viewpoint will trigger the need for an Individualized Learning Plan in Student Plans
